Peacock Feathers

Peacock feathers are perfect for decorating. They can be very bright, or done with metallic threads or even one color. The one color designs are also perfect for variegated thread. These designs can be used on blouses, jackets, linens and I think some of them would look great going up the leg of a pair of jeans. Though one peacock feather is a great decoration all by itself I've given you some ideas for combining these designs into larger embroideries or to make borders. I've included a file that lists the metallic threads I used when stitching some of the samples.
